

AOPA PROGRAM PAVILION SCHEDULE

TUESDAY, APRIL 5

10:00 - 10:45 am

Mind Over Matter - George Perry

Being a safe pilot requires more than good stick and rudder skills. Learn simple techniques to increase pilot performance and reduce pilot error from the Senior Vice President of AOPA's Air Safety Institute.

11:00 - 11:45 am

ADS-B Panel Discussion: 978UAT vs. 1090ES - What Is Best For My Airplane? - Mike Collins

A panel of avionics manufacturers will discuss the best ADS-B technologies for your aircraft. Learn more about the FAA's 2020 ADS-B Out mandate. Bring your questions!

12:00 - 12:45 pm

Jeppesen: RNAV Revealed - Slim Morgan

Join an industry leader for a refresher course on some critical RNAV basics, reveal a few tips and tricks to help you get more from today's technology, and offer you actionable insights for your next and future flights.

1:00 - 1:45 pm

Are You Breathing Enough Oxygen? - Dr. Paul Buza

Did you know that mild hypoxia can set in at altitudes well below 12,500 feet? Discover what you need to know about the oxygen your body needs at all altitudes from a leading aviation medical expert.

2:00 - 2:45 pm

NTSB's Most Wanted, Loss of Control: Introduction to Aspen's Angle of Attack Indicator - Scott Smith

Reduce the likelihood of loss of control accidents by increasing stall margin awareness.

3:00 - 3:45 pm

Lightspeed: What You Need to Know About The Latest Headset Technology - Teresa De Mers

Before you buy your next headset, learn about the avalanche of technological advancements that have occurred in the past few years from a leading headset manufacturer.

WEDNESDAY, APRIL 6

DON'T MISS THIS!

8:30 - 9:30 am

Coffee & Donuts with AOPA President Mark Baker (AOPA Pilot Town Hall)

Talk with AOPA President Mark Baker and learn about AOPA's latest efforts in Washington, D.C. and other key AOPA initiatives while enjoying fresh coffee and donuts.

10:00 - 10:45 am

Emergency! Getting It Right When Things Go Wrong - Mark Grady

Real-world emergencies are rare enough that it's easy to get complacent. Join the AOPA Air Safety Institute as we focus on how to keep abnormal situations from becoming full-blown emergencies, offer advice on keeping critical problems under control, and give our best advice on off-airport landings.

WEDNESDAY, APRIL 6 CONTINUED

11:00 - 11:45 am

ADS-B Panel Discussion: Understanding the Benefits of ADS-B - Mike Collins

Join us for a panel discussion, including avionics manufacturers, that will explore the benefits of ADS-B technology. Learn how to comply with the FAA's 2020 mandate for ADS-B Out. Bring your questions!

12:00 - 12:45 pm

Maximum Fun, Minimum Cost: How to Start a Flying Club - Jamie Beckett

Discover the ins and outs of creating more affordable and social flying through forming and leading a flying club.

1:00 - 1:45 pm

Going Higher: America's Community Airports - AOPA President Mark Baker & Dawn Veatch

Community airports in the United States offer far more value than is normally understood. AOPA President Mark Baker and the Government Affairs team will discuss the value of the local airport and debut a short film highlighting several airports in central Florida narrated by Mark Baker.

2:00 - 2:45 pm

10 Things You Should Know About Flying with an iPad & ForeFlight - Dominik Ochmanek

Bring your iPad to follow along during this technical briefing on integrating an electronic flight bag into your planning, flying, and debriefing activities.

3:00 - 3:45 pm

Piston Engine Care for Enhanced Safety, Reliability, Durability & Efficiency - Bill Ross

If you want to make your flying more affordable while increasing reliability, then join Superior Air Parts' Vice President for a discussion on simple maintenance recommendations and operating practices that owners should do in order to fly safer and avoid costly repairs.

THURSDAY, APRIL 7

10:00 - 10:45 am

The Lost Art of Stick & Rudder Flying - Rod Machado

Join iconic CFI and author Rod Machado for an insightful look into some of the most important skills in flying.

11:00 - 11:45 am

ADS-B Panel Discussion: Equipage Ideas That Could Save You Money - Mike Collins

This panel of avionics manufacturers will share ideas about the most cost-effective ways an aircraft owner can meet the FAA's 2020 mandate for ADS-B Out. Bring your questions!

11:00 am - 12:00 pm

Patty Wagstaff Autograph Signing at AOPA Campus

Get an autograph and take a photo with the most well-known female pilot in the world, located in our AOPA courtyard.

—CONTINUED ON BACK—

SPECIAL AOPA MEMBER DISCOUNT

Save \$30 off a weekly pass or \$5 off daily passes by using AOPA217 in the discount code box during checkout at aopa.org/saveSNF16.

THURSDAY, APRIL 7 CONTINUED

12:00 - 12:45 pm

No Pilot to Co-Pilot: Basic Skills For Non-Pilots - Chris Moser

From the non-pilot who flies often with a friend or family member to the aviation enthusiast interested in learning the basics of piloting, this session will help you discover the basics of flight, understand the cockpit, and learn how you can become a pilot or helpful cockpit companion.

1:00 - 1:45 pm

Garmin Pilot: Using an iPad to Plan, File & Fly - Jan Mackenzie

This seminar will highlight how to navigate using unique and innovative features found within Garmin Pilot on iOS and Android mobile devices. Pilots will learn how to plan, file, fly, and leverage exclusive connectivity features offered by Garmin Pilot and Connex to enhance their flying experience.

2:00 - 2:45 pm

Accident Case Study - George Perry

Utilizing physical evidence, eyewitness testimony, and other leads to figure out what went wrong and why, join the Senior Vice President of AOPA's Air Safety Institute to learn how to be a safer pilot through safety-oriented accident analysis.

3:00 - 3:45 pm

PS Engineering: How Pilots Can Benefit From True Dimensional Sound - Mark Scheuer

Pilots learned how to fly in 3-dimensional space. Now, learn how pilots can take advantage of the space between their ears and use their true dimensional hearing to enhance their flying experience.

FRIDAY, APRIL 8

10:00 - 10:45 am

Handling In-Flight Emergencies - Rod Machado

Rod will provide you with ideas for successfully avoiding and coping with some of the most serious airborne problems.

11:00 - 11:45 am

ADS-B Panel Discussion: Which ADS-B Solution Is Best For Me? - Mike Collins

A panel of avionics manufacturers will discuss the best ADS-B technologies for your aircraft. Learn more about the FAA's 2020 ADS-B Out mandate. Bring your questions!

11:00 am - 12:00 pm

**Patty Wagstaff Autograph Signing at AOPA Campus
Get an autograph and take a photo with the most well-known female pilot in the world, located in our AOPA courtyard.**

12:00 - 12:45 pm

Campus Spinning 101: Basics of Spins & Spin Recovery - Catherine Cavagnaro

Learn about and see the basics of stalls, spins, and spin recovery in this exciting session led by an expert in spins, emergency maneuvers, and aerobatic training.

1:00 - 2:00 pm

Ice Cream Social With AOPA President Mark Baker (AOPA Pilot Town Hall)

Cool off with refreshing ice cream while AOPA President Mark Baker talks about AOPA's latest efforts in Washington, D.C. and other key AOPA initiatives.

FRIDAY, APRIL 8 CONTINUED

2:00 - 2:45 pm

Setting Personal Minimums - George Perry

Becoming a safer pilot, whatever the airplane and no matter the flight condition, can become a reality by creating personal safety minimums that guide our decisions based on our individual currency, proficiency, comfort levels, and experience with the particular aircraft and flight conditions. Join the Sr. V.P. of AOPA's Air Safety Institute for an impactful discussion on developing a plan to be a better, safer pilot.

3:00 - 3:45 pm

SiriusXM: Flying with Datalink Weather - Arlo Gambell

Is paying for onboard, satellite-delivered weather worth it? Discover the details of satellite-delivered aviation weather.

SATURDAY, APRIL 9

7:30 - 10:30 am

Rusty Pilots - Chris Moser & Jamie Beckett

Life may have gotten in the way, but the dream of flight can be yours again. Find out how returning to the skies may be easier than you think, get brushed up on your skills and knowledge, and receive an endorsement in your logbook for the ground portion of your next flight review!

11:00 - 11:45 am

Aviation Humor - Rod Machado

Laugh and learn with Rod as he shares his best stories acquired through 10,000 hours of flight time earned the hard way—one CFI hour at a time.

11:00 am - 12:00 pm

**Patty Wagstaff Autograph Signing at AOPA Campus
Get an autograph and take a photo with the most well-known female pilot in the world, located in our AOPA courtyard.**

12:00 - 12:45 pm

USS Cole: Decision-Making in Crisis - Kirk Lippold, CDR USN (Ret.)

Commanding officer of the USS Cole when it was attacked off the coast of Yemen on October 12, 2000, avid aviator and AOPA life member Kirk Lippold, USN (Ret.) will share insights we can apply to our decision-making during any crisis—especially those in the air.

1:00 - 1:45 pm

Mind Over Matter - George Perry

Being a safe pilot requires more than good stick and rudder skills. Learn simple techniques to increase pilot performance and reduce pilot error from the Senior Vice President of AOPA's Air Safety Institute.

2:00 - 2:45 pm

Pilot's Decision-Making: Lessons Learned From Circumnavigating the World - Robert DeLaurentis

Flying the "Spirit of San Diego" around the world, author and aviator Robert DeLaurentis will share invaluable safety lessons learned that can be applied in any flight scenario.

3:00 - 3:45 pm

Avidyne: Technologically Advanced Aircraft & the IFD540/IFD440 Features - Tom Harper

Discover how the design and interface features of Avidyne's IFD540 & IFD440 address issues discovered in the Technically Advanced Aircraft Study conducted by the Flight Safety Foundation in 2003.
