

(14 CFR) part 71 to establish VOR Federal airway V-629 near Las Vegas, NV. The proposed route would extend between a point approximately 26 NM northeast of the Goffs, CA, VORTAC and the Boulder City, NV, VORTAC. The purpose of the proposed route is to increase the efficiency of the NAS in the vicinity of Las Vegas and to provide positive course guidance for aircraft navigating in an area of marginal radar coverage.

VOR Federal airways are published in paragraph 6010 of FAA Order 7400.9V dated August 9, 2011, and effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The airway listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the route structure as required to preserve the safe and efficient flow of air traffic in the Las Vegas, NV, area.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E,

"Environmental Impacts: Policies and Procedures," prior to any FAA final regulatory action.

Proposed Modification of VOR Federal Airway V-170 in the Vicinity of Devils Lake, ND

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify VHF Omnidirectional Range

(VOR) Federal airway V-170 between Devils Lake, ND (DVL), and Jamestown, ND (JMS). The FAA is proposing this action to ensure the airway provides the necessary clearance from the western boundary of the newly established restricted area R-5402, Devils Lake, ND, to support non-radar separation requirements when the restricted area is active.

DATES: Comments must be received on or before October 22, 2012.

Background

The Minneapolis Air Route Traffic Control Center requested the establishment of a new VOR Federal airway between DVL and JMS, west of V-170, to provide necessary clearance from the western boundary of R-5402, established for hazardous laser training activities, in support of non-radar separation requirements. Their request proposed the new airway use the DVL VOR 180° (M) and JMS VOR 327° (M) radials to provide the required non-radar separation and airway clearance from R-5402, regardless of the restricted area status, as well as 15 degrees of separation from V-170. The Central Service Center (CSC) conducted a feasibility review of the request and recommended amending the existing V-170 airway between DVL and JMS instead of creating a new airway in that area.

The Feasibility Review Panel considered potential impacts to flight procedures, safety, environmental, air traffic control procedures, and other pending en route or terminal actions in their review, and determined that amending V-170 between DVL and JMS

would be the best alternative. They also determined that inserting a slight "dogleg" to the west, in V-170 between DVL and JMS, would provide a non-radar routing clear of R-5402 and allow nonparticipating aircraft below 8,000 feet MSL to have unimpeded transit between DVL and JMS.

This proposed action to amend V-170 is expected to ensure availability of the airway between DVL and JMS regardless of restricted area status with minimal impact to the aviation community.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to modify V-170 between Devils Lake, ND, and Jamestown, ND, by inserting a slight dogleg west of the current location. This action is proposed as a result of the V-170 airway width abeam R-5402 overlapping the western boundary of the recently established R-5402 and to retain the availability of the navigation route structure between DVL and JMS regardless of the activation status of R-5402.

The FAA proposes using the DVL VOR 187° (T)/180° (M) and JMS VOR 337° (T)/327° (M) radials to redefine the airway segment and establish the FARRM fix at the intersection of the DVL VOR 187° (T)/180° (M) and JMS VOR 337° (T)/327° (M) radials. The FARRM fix would be described as the intersection of those navigation aid radials in the legal description. Specifically, the V-170 description would be amended by replacing the "Jamestown, ND;" reference with "INT Devils Lake 187° (T)/180° (M) and Jamestown, ND, 337° (T)/327° (M) radials; Jamestown;". The magnetic radial information would be removed in the final rule. This proposed modification to V-170 would add less than three nautical miles to the existing airway segment, ensure availability of V-170 between DVL and JMS regardless of the status of R-5402, reduce airspace complexity in the area, and enhance flight safety.

VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.9V dated August 9, 2011 and effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The VOR Federal Airways listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1)

Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it proposes to modify VOR Federal Airways in the vicinity of Devils Lake, ND.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," prior to any FAA final regulatory action.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because these regulations do not impose a collection of information on small entities, the provisions of the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply. Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and the Treasury Department request comments on the clarity of the proposed rules and how they can be made easier to understand. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and
