

FOR RELEASE July 27, 2021

## **Aviation Safety Resources to Supply Aircraft Emergency Parachute Recovery Systems to Sky Designs for the Sky-6 Aircraft**

***Sky Designs Engineering Just Announced the New Sky-6.***

OSHKOSH, WI and NICHOLASVILLE, KY (July 27, 2021) [Aviation Safety Resources, Inc.](#), (ASR) will supply its Soteria Aircraft Emergency Parachute Recovery System (AEPRS) to Sky Designs Engineering ([Welcome | skydesigns](#)) for its newly announced Sky-6 aircraft. All Sky-6 customers will now benefit from ASR's advanced technology with best-in-class technical AEPRS performance.

"Our relationship with ASR has already demonstrated the organization's worth. Their superior technology, combined with expert technical support, ensures an excellent value and reliable AEPRS for the Sky-6. We wanted to work with a company that mirrors our operating philosophy and customer centric focus, and ASR does just that," says Ken Krueger of Sky Designs Engineering. "The ability to tailor the AEPRS and the responsive, pro-active engineering team, has shown that ASR meets and often exceeds our needs."

Over the last year, ASR has been working with Sky Designs Engineering to optimize the installation and integration of the AEPRS on the Sky-6. "This work with Sky Designs Engineering validates the importance of our approach of creating tailored engineering solutions from the early stages of the aircraft design," says Tom Hodgdon, Director of Program Engineering for ASR. "We recognize ASR's value is not simply budget related, but in putting the customer first in terms of efficiency and focus we can design and integrate our Soteria products effectively. We emphasize the importance of supporting the differing requirements of a specific aircraft design and AEPRS integration from the beginning. I know that the team is excited to build upon this relationship with Sky Designs Engineering. ASR recognizes the significance of supporting the customer and contributing to their success. It is a tribute to our team, their hard work, and dedication, and I'm extremely proud of them."

### ***About Aviation Safety Resources***

*Aviation Safety Resources, Inc., based in Nicholasville, Ky., designs, tests, and produces whole aircraft emergency recovery parachute systems designed to safely bring down the entire aircraft and its occupants in the event of an in-air emergency. Staffed by a team of experienced aviation professionals, ASR is the first to offer the next generation of whole-aircraft recovery systems and the first system specifically designed*

for the vertical take-off and landing (VTOL) vehicles of Advanced/Urban Air Mobility (A/UAM). For more information, please visit [www.aviationsafetyresources.com](http://www.aviationsafetyresources.com)

**About Sky Designs Engineering**

*Ken Krueger has always had a vision for an aerospace engineering firm that would bring the future into our lives in a way that no other company has done before. This dream came true when Sky Designs Engineering was established with the goal of providing innovative engineering solutions. We would love to share our imagination with you and create airplanes that are precision taking flight.*
