

ATTENTION: Nevada Pilots

Fellow Pilots,

In light of recent aviation safety concerns in the North Las Vegas area, we have an opportunity to reaffirm that safety is the number one operational priority for general aviation pilots. While I am aware of the unique nature of the accidents that occurred near North Las Vegas Airport, it has raised questions about general aviation safety and has tarnished the community's perception of pilots flying in the area.

Join me in sending a message to the people of Las Vegas and the authorities by showing that you care about safety. Visit www.asf.org and take one or more of the courses shown below between now and Friday September 12, 2008. Each course counts as a vote for safety and at the end of next week we will show to the media and Las Vegas aviation and government officials how important safe flight is to you.

Please complete one of the following courses by Friday, September 12!

- [Essential Aerodynamics: Stalls, Spins and Safety](#)
- [Accident Case Study: VFR into IMC](#)
- [Mountain Flying](#)
- [Engine and Propellers](#)
- [Know Before You Go: Navigating Today's Airspace](#)
- [Aging Aircraft](#)
- [Runway Safety](#)

Remember, we will count every course completed by the pilots in your area from now until September 12. Stand up and be counted for GA safety. We will all benefit by this tangible effort.

Safe Flights to all...

Bruce Landsberg
