Aerospace STEM Careers

If you can think of a career, it exists in the aerospace industry

AOPA Foundation High School Aviation STEM Curriculum

FREE Four-year STEM curriculum
in Pilot and Unmanned Aircraft Systems pathways

High-demand
aerospace careers

Industry-recognized
stackable credentials and
industry certifications

Built for teachers by
teachers and pilots

Rigorous, comprehensive,
flexible, and FREE

What's Included?

Everything a teacher needs to provide engaging instruction from day one.

Lesson Plans

YOU CAN FLY
AOPA FOUNDATION
HIGH SCHOOLS

The "Wright" Approach

DESIRED RESULTS

ESSENTIAL UNDERSTANDINGS
Appreciate the rich, global history of aviation/aerospace and the historical development and expansion. (EU1)
Understand the importance of professionalism, ethics, and dedication as to operations. (EU4)

ESSENTIAL QUESTIONS
1. What about the Wrights' methods made them successful where others failed?
2. What questions did the Wrights have to answer to accomplish sustained, controlled flight?
3. How important were these developments in the achievement of powered, controlled flight?

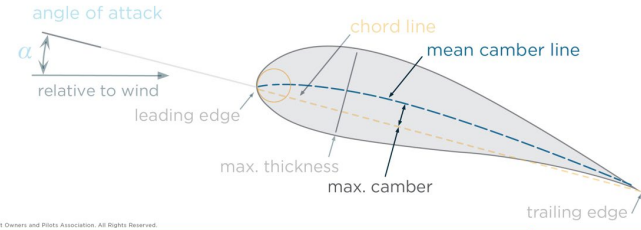

LEARNING GOALS

Students Will Know <ul style="list-style-type: none">That testing models is a way to prove theoryThe challenges the Wright brothers had to overcome to make powered, controlled flight a realityEngineering practices the Wright brothers used to overcome the challenges of powered, controlled flight	Students Will Be Able To <ul style="list-style-type: none">Describe how aircraft today are still designed using the same principles the Wright brothers used. (DOK-L2)Explain ways in which the Wright Brothers solved for the challenges of controlled flight. (DOK-L4)
--	--

ASSESSMENT EVIDENCE

AIRFOIL CURVATURE

- Camber** – the curve of the wing
 - The mean camber is a line drawn between the leading and trailing edge so that the distance between the upper and lower surfaces is equal
- Max Camber** – measured where there is maximum distance between the chord line and the mean camber line

What's Included?

Everything a teacher needs to provide engaging instruction from day one.

Student Activities

Assessments

Teacher Notes & Rubrics

UNIT 4 | SECTION A | LESSON 1 | INTRODUCTION TO AERONAUTICAL CHARTS | STUDENT ACTIVITY 8

Reference the following figure for the next two questions:

Editorial credit: FAA Sectional Chart

5. You're beginning your planning for a flight through this area. Based on the figure provided, what's the minimum altitude you could fly in the region without being in danger of hitting an obstacle or obstruction?

- 2,300 feet AGL
- 1,980 feet AGL
- 2,300 feet MSL
- 1,980 feet MSL

UNIT 2 | SECTION D | LESSON 2 | BUILD AND TEST A WIND TUNNEL | STUDENT ACTIVITY

3 **AIRFOIL MOUNT**
Build the two side structures for the airfoil mount.

Put one of the pieces of wire between two of the 1" x 3" pieces of foam. You are not gluing the wire to the pieces; it is just providing a spacer. You will pull the wire out once the side structure is assembled.

Apply hot glue to the inside of both foam pieces and center another 1" x 3" piece of foam on top. Press down and let the glue cool.

UNIT 9 SECTION B LESSON 1 RUBRIC			
UAS TEAM OPERATIONS			
AOPA YOU CAN FLY HIGH SCHOOLS			
RUBRIC			
Name _____			
Class _____			
Your instructor will use the following rubric to assess your presentation.			
Criteria	3 - Successful	2 - Somewhat Successful	1 - Unsuccessful
Team Presentation	The project description and supporting materials are clear and presented in a logical sequence.	The project description and supporting materials are not always clear. The sequence of the presentation may be hard to follow at times.	The description of the project is poor and supporting materials are missing or of poor quality.
Presentation Delivery	Presenter(s) speak clearly and confidently and make eye contact with the audience.	Presenter(s) speak unclearly, lack confidence, or make little eye contact with the audience.	Presenter(s) speak unclearly, lack confidence, and make little eye contact with the audience.
Team Cooperation	Team works well together and shares tasks responsibly and equally.	Team mostly works well together, but some members do more than others.	Team members do not cooperate well. Members rarely offer useful ideas. Team members are disruptive.
Time Management	Sets realistic goals for deadlines and meets or exceeds those goals.	Sets somewhat realistic goals for deadlines and meets most of those goals.	Deadlines are unrealistic or non-existent. Deliverable may be late.
Completeness	Team follows all instructions and completes all Project Packet worksheets.	Team does not follow some instructions or does not complete all Project Packet worksheets.	Team does not follow most instructions and does not complete most Project Packet worksheets.
Project Goals	Project deliverable meets all of the goals set by the team.	Project deliverable meets some of the goals set by the team.	Project deliverable meets few, if any, goals set by the team.
Feedback	Receives positive feedback from the client.	Receives some positive feedback from the client.	Does not receive positive feedback from the client.

FREE PROFESSIONAL DEVELOPMENT WORKSHOP

FOR HIGH SCHOOL TEACHERS, COUNSELORS, & ADMINISTRATORS.

Limited spaces available • Breakfast and lunch included • Hands-on activities • Offsite tours

Earn up to
18 CE Hours
from Embry-Riddle
Aeronautical
University.

LEARN HOW TO PREPARE YOUR STUDENTS FOR AEROSPACE STEM CAREER SUCCESS

WHY ATTEND

- Discover innovative teaching methods while you deep dive into our free Aviation STEM curriculum.
- Engage in structured hands-on activities that bring aviation STEM concepts to life.
- Connect with like-minded educators, exchange ideas, and build new relationships with long-lasting impacts.
- Explore potential collaborations with other schools and districts to enrich your curriculum and make learning more exciting for your students.
