We began with an introduction session where students from different nationalities shared their backgrounds. This created a welcoming atmosphere and encouraged interaction and collaboration among classmates, which was extremely valuable throughout the training. Another highlight was the informal conversations with the instructors during coffee breaks. These moments went beyond the standard curriculum, as they shared personal experiences and insights from their careers. This exchange of real-world knowledge added tremendous value to the program and enriched our learning far beyond the classroom and simulator. I must also highlight the continuous support from the entire team, who were always attentive and available whenever needed. Their professionalism and dedication made the entire process smooth and reassuring, allowing me to stay focused on my learning journey. The combination of technical excellence in both classroom instruction and simulator practice, together with the human side of mentorship and support, made King Sky's program truly exceptional. The majority of problems are being solved in advance, and many even have ready solutions. The school actively accommodates its students by rescheduling their training, as many students prepare their visit in advance and may arrive from abroad. The instructors are active pilots from the US major airlines, are always friendly and able to provide knowledge beyond the standard curriculum. Everything is simple, predictable and friendly. Really enjoyed the course.</p>

With courtesy and rapidness in responses, the staff was able to provide all the assistance to make sure I would have the perfect flight training program. Not only taking care of that, but they also detailed the document list needed for the process and double checked it for me. They made the entire bureaucracy easy, explaining every single step so I wouldn't have any doubts. The cost of the training was also very well thought, offering a competitive price and, at the same time, valuing their staff. Another high point of the school is the quality of the building and its class rooms. Technology was well used for the easiness of comprehension and demonstration of the theory. Videos made it easier to understand what the instructors were explaining about and brought a touch of reality to the subjects. Besides being focused on delivering great quality lessons, the team also prepared a great environment for learning through shared experience between the students encouraging all of us on engaging on telling each other past events. The rich environment also included rest areas where we could unwind and be ready for the next activities. All the instructors are friendly and welcoming, but even more important is the level of professionalism and knowledge they carry. Their classes and simulator sessions were well organized and covered important topics bringing me a whole new point of view. They are very well experienced pilots and instructors and that elevated the quality of the classes by much. Allied to the experience of the instructors, the material offered such as books, articles and studies deepened the level of information delivery. The easiness of scheduling simulator sessions made it very comfortable and it is well appreciated. On top of all that, they have a great portal with all the information and assistance I needed throughout the entire course. I do recommend KingSky for the award</p>

Each student isn't just a number, but a person with a dream. Our instructors tailor their teaching to each student's personality and pace. They never rush, never give up — they just want to see you grow safely and confidently as a pilot. The atmosphere here is amazing. Students help each other out, fly together, and learn together like friends. Our instructors often share their own flying stories and experiences, teaching not only how to fly, but also why we fly a certain way. 90.00	<p>This Flight School truly deserves to win a Flight Training Experience Award. From the very beginning, it was an amazing opportunity to train here. The school provides not only high-quality instruction but also a warm and supportive environment that makes every student feel welcome. The staff is exceptionally friendly, professional, and always willing to go the extra mile to help. 90.00	<p>I earned my B737 Type Rating at Kingsky Flight Academy, and my experience with the school has been extremely satisfying. When I decided to pursue the B737 type rating course, I compared several flight schools, but ultimately chose Kingsky because of their consistently prompt responses to online inquiries during the consultation process. The staff were both patient and professional in addressing my questions. On the first day of training, I ended up at the wrong location due to a navigation error and arrived late. However, the instructor reassured me not to worry, voluntarily offered to make up the missed content after class at no extra cost, and promptly informed other instructors about my situation—I was truly grateful for that. During the simulator training phase, the instruction was exceptionally thorough, consistently highlighting key details that are easily overlooked during flight. Since I was training individually, the instructor often invited me to observe other trainees' sessions inside the simulator. The school's logistical support was also impressive—on one occasion when the simulator's air conditioning wasn't working properly, the instructor made one call, and maintenance personnel arrived immediately to handle it. In summary, I highly recommend Kingsky Flight Academy as your choice for aviation training.</p>

81.00	<p>When I (with a foreign ATPL and a green card) decided to work on my ATPCTP, I was given the recommendation by multiple captains to contact Kingsky Flight Academy. From initial contact with one of the instructors to having completed my FAA written (communications, quality of staff and support, the facilities, course etc), my whole experience to do the ATP CTP was a very smooth one. The staff were extremely friendly to me and provided no shortage of information/experiences of their aviation journeys. On a more personal regard, Kingsky hosts a wider range of instructors who were able to give me a good personal perspective on the migration process to the USA and it was a privilege to have the opportunity to speak to captains from B747/B777/B767/B757 fleets across the United States. Upon my return, I have already been offering the same recommendations I received to go to Kingsky that I received 6 months ago.</p>

85.00	Because the school is very good its instructors and the study methodology is very good and generates a very calm and cooperative environment when looking for me help with any questions I think it should be rewarded because everyone in the school is willing to help and that all its students fulfill the dream of being pilots
74.00	Good comunication and good schedule
90.00	<p>Bush Air with its Advanced Flight Training Course is a unique experience that proves the theorie and expands the horizon of any pilot! Every pilot at any level and with any amount of hojrs will learn something new in this course and become a better pilot. There is no other school known to me with that knowhow, equipment and last but not least...hospitality! Having a course where you can stay, get food and entertainment is unique and makes it a special memory for every attendant! I have deep respect and admiration for Bush Air and am happy as also proud to be able to attend twice!</p>

90.00	In my opinion, this Flight School deserves the award because my experience with them was excellent from start to finish. From the initial contact, onboarding, the staff and instructors were consistently friendly, knowledgeable, and eager to help, creating a welcoming environment for students. Their website (with their scheduling/rostering), facilities, and simulator area are well-designed and professional, adding to the quality of the training experience. Their instructors are highly experienced and skilled, which gave me great confidence in my course. Overall, I had an outstanding experience and would highly recommend this school.
90.00	This flight school truly deserves the AOPA Flight Training Experience Award because it provides far more than just flight instruction — it offers a complete, supportive learning journey. From the very first day, students are welcomed into a structured, professional, and genuinely student-centered environment. The instructors are not only highly skilled but also patient, empathetic, and deeply committed to helping each student progress at their own pace. What really sets this school apart is its consistency in communication, safety, and quality. The aircraft are always well-maintained and readily available, scheduling is efficient, and students are consistently kept in the loop. Training extends well beyond preparing for checkrides — it equips students with real-world flying skills, confidence, sound judgment, and a strong foundation in aeronautical decision-making. Above all, this school promotes a culture of respect, encouragement, and continuous growth. Students feel like valued members of a community, not just customers. That genuine sense of belonging and excellence is what makes this flight school truly worthy of recognition.
74.00	I studied at this school. I appreciate the excellent service and work. During my studies, everything was well-organized for a comfortable learning experience. I was also always in touch with the staff, which allowed me to get answers to all my questions promptly. I highly recommend this school. Great job! Thank you for your hard work
87.00	Because this school provided me one of the best training that I have ever had. The qualified instructors were considerate and gave me a perfect training experience . The school is equipped with high-quality classroom and simulator. The facilities were excellent and the sessions provided a true-to-life experience.
70.00	Their well organized training structure is followed by instructors well and they are very helpful.
90.00	Amazing school.
86.00	Excellent job of communication and teamwork throughout the entire process was able to do the ground school from the convenience of my home and had wonderful instructors in the Flatt training device and simulator.
86.00	My experience with the school was excellent. Communication was outstanding, the staff was always attentive and quick to resolve any issue. As a pilot living abroad, I really appreciated their help in making sure all the paperwork and procedures were completed on time and without complications. Once the course started, both the instructors and the staff proved to be highly competent, and the facilities were modern and well equipped. The location was also perfect, with easy access from anywhere. I had contacted other schools before, but from the very beginning this one stood out as the most professional.
88.00	They should win. Simply because everything works like they know you for a long time. You fell at home since the first day you step there. you are treated like equal , not like someone at lower level. They are very friendly, but extremely efficient.
90.00	From the very beginning, communication was clear and consistent, and the service was always friendly and professional. They accommodated all my scheduling and training needs—no small feat given my limited availability as an airline pilot. I completed a Reduced Type Rating (TR) on the Boeing 737 MAX 8, and both the ground and flight training facilities were well suited to the program. Above all, the instructors' quality, kindness, and human touch were pivotal to my success. The documentation was well organized from day one, and I appreciated the use of digital platforms for scheduling, document management, and payments. I wholeheartedly recommend Kingsky Flight Academy—truly excellent work.

10. Net Promoter Score

10.1 Questionnaire Responses

The Net Promoter Score is generated by asking customers how likely they would be to recommend a given product or service - in this case, your services as a flight instructor to another potential customer, on an 11 point scale.

How likely are you to recommend your CFI to someone interested in flight training?

Response Choice	Frequency	%
10	65	95.59%
9	2	2.94%
8	1	1.47%

10.2 NPS Grouping

Responses to this question are then used to sort customers into one of three groups:

Detractor: Less likely to use your services again and may not speak highly of your services to others.

Passive: Generally somewhat satisfied, passive respondents likely won't help or hurt your business in talking to other people.

Promoters: Ideally, all of your customers would be promoters. Promoters would fly with you again in the future and would tell others how great they think you are.

Response Choice	Frequency	%
Promoter	67	98.53%

Passive	1	1.47%
---------	---	-------

10.3 Standardized Score Calculation

The overall Net Promoter Score is calculated by subtracting the percentage of your customers who are 'detractors' from the percentage of your customers you are 'promoters.' Thus, the overall Net Promoter Score can range from - 100 to 100.
