Total Score	Student Review
89.00	You'd want Royce Howley, my flight instructor for flight school, because he doesn't just teach you how to fly—he teaches you how to think like a pilot. He has this way of breaking things down so they're not overwhelming, but at the same time he pushes you to be sharp and confident in the cockpit. It feels less like you're being lectured and more like you're learning from someone who genuinely wants to see you succeed. He's patient when you need it, but he knows exactly when to challenge you so you don't get too comfortable. That mix of support and high standards is what makes him the kind of instructor who not only gets you through flight school but makes you a better aviator for the long run.

10. Net Promoter Score

10.1 Questionnaire Responses

The Net Promoter Score is generated by asking customers how likely they would be to recommend a given product or service - in this case, your services as a flight instructor to another potential customer, on an 11 point scale.

How likely are you to recommend your CFI to someone interested in flight training?

Response Choice	Frequency	%
10	23	95.83%
8	1	4.17%

10.2 NPS Grouping

Responses to this question are then used to sort customers into one of three groups:

Detractor: Less likely to use your services again and may not speak highly of your services to others.

Passive: Generally somewhat satisfied, passive respondents likely won't help or hurt your business in talking to other people.

Promoters: Ideally, all of your customers would be promoters. Promoters would fly with you again in the future and would tell others how great they think you are.

Response Choice	Frequency	%
Promoter	23	95.83%
Passive	1	4.17%

10.3 Standardized Score Calculation

The overall Net Promoter Score is calculated by subtracting the percentage of your customers who are 'detractors' from the percentage of your customers you are 'promoters.' Thus, the overall Net Promoter Score can range from - 100 to 100.
